

Primary education in the area of the Prefecture of Evros during the period 1920-40.

ABSTRACT

The doctoral dissertation concerns a research on the schools of primary education of the Prefecture of Evros during the period 1920-1940 and specifically the following 17 Primary Schools: 1st and 3rd Elementary School of Alexandroupolis, 1st and 2nd Didymoteicho, 1st and 2nd Orestiada, 1st and 2nd Soufli, 1st Feron, Apalou, Dikaion, Lavara, Metaxadon, Kastaneon, NeaVyssa- Karatheodoreio, Rizion and Tycherou. Its purpose is to research three parameters (the number of students, the stagnation and the professions of the parents) in order to highlight and connect with the general educational activity that prevailed at that time 1920-1940 and its historical context. The research data will emerge from the use of textbooks and practices of the respective schools. In terms of stagnation, through its control, we want to document based on primary data, the bibliographic reports that emphasize its intense existence during this period. In addition, the professions of the parents will help us to investigate on the one hand the origin of the students and on the other hand the socio-economic situation of the parents. At the end of the research, the recording of the proposals by the researcher contributes to the progress of science, as anyone interested can notice which research field has not been explored and even start their research activity.
